## **Congratulations Mobinil Egypt**

I would like to praise this wonderful legal performance executed by the Egyptian Mobinil group under the leadership of Naguib Sawiris to preserve the Egyptian Nationality of the mother company in the communication field in Egypt, as well as this splendid execution in maintaining respectful Egyptian traditions in the free economy and using the market mechanism despite the recency of the Egyptians in this aggressive economical definitions in the Global market.

Nevertheless, the adherence to the rights and aiming at not loosing them as well as complying with the rules and tariffs organizing the Capital Market Authority (CMA) despite of the opposition to what have been achieved before having recourse to the Egyptian administrative Jurisdiction.

Following all steps were the main axis of interest for every Egyptian citizen, everybody was waiting for a closing or ending in the Egyptian meaning for this economic match between 2 teams, the first team is a foreigner who tries to completely deprive the will from the national partner and a stubborn national partner who knows the rules of the game, and who never neglects his rights, and accordingly Egypt's rights to act as a valuable respectful partner in his own country.

Due to my personal relationship with the great commander of the legal team, who is representing the national partner "Naguib Sawiris" and whose name is Dr. Hani Sarie-Eldin, the former chairman of the "Egyptian Financial Supervisory Authority" and the corrector and innovator in the capital market not on the Egyptian level only but I think on a greater regional level and almost on an international level.

This young man made a great change during his leadership of the former CMA under the insistence of the dynamic Economic guru in the Egyptian government Dr. Mahmoud Mohie Eldin; in spite of that Dr. Hani apologized and submitted his resignation to leave the authority to devote more time for "the Faculty of Law" – Cairo University – as a Head Section of an academic department - , then for his own Law Firm which is considered to be a leading Law Institute or Firm in the country – like one or two others in Egypt - we are honored to have them and pleased that the field of law and management in Egypt include such highly qualified experienced members.

I was sure and aware, being closely related to Dr. Hani Sarie-Eldin, in fact I stated from the very first beginning when the debate started between France Telecom and Orascom, and the "EFSA" – the Egyptian Financial Supervisory Authority's acceptance of the first offer; the breath retention of the Egyptian partner in front of the administrative Egyptian decision to attend to a specialized court for administration / management as the highest Egyptian respectful judicial power; I was sure again of 2 main things:

The exceptional power of the Egyptian lawyer of the national partner Dr. Sarie-Eldin, his great wisdom and his extraordinary justice, there is no other doubt about his wisdom and fairness and he is representing the Egyptian jurisdiction.

The final legal judgment obtained has delighted me like all other Egyptian citizens; the stubborn understanding national team who was really a big fighter deserved appreciation and blessing.

We are in great need to support our economy and to work hard for our own country's welfare; we are not against the foreign invasion, but when it comes to winning a battle he should be right and then it will be a big failure for us; and thanks God we are not a looser!
